

STATE OF WASHINGTON
WATER RESEARCH CENTER

2024 SPRING SEMINAR SERIES

Bring your lunch and learn about water research in Washington State at the Water Research Center's virtual lunchtime seminar series. We will hear from one of the 2022-23 seed grant recipients.

Integrating Agricultural Water Use into Climate Change Impact Assessments

Thursday, April 18, 2024
12:00-1:00

Dr. Kirti Rajagopalan and her team are working to improve climate change impact assessment methods. The work integrates agricultural water use into modeling to provide a more accurate picture of water demand during extreme weather events.

Kirti Rajagopalan is part of the Land, Air, Water Resources, and Environmental Engineering emphasis area of the Department of Biological Systems Engineering. She has a Ph.D. in Civil Engineering from Washington State University and a MBA from Iowa State University.

All webinars are free and take place from 12:00-1:00 p.m. Registration required.

Learn more and register at www.wrc.wsu.edu.
